REMARKS

The Office Action dated March 19, 2004 has been received and carefully considered. The Examining Attorney has refused registration of the Applicant's mark because the Applicant must specify the types of memories, the use of substrates, the function and use of

network software and interface software. The Examining Attorney also stated that application must specify the components of the process distribution systems or the function and use with respect to the system. Further, the Examining Attorney stated that Applicant must specify that the design services are "for others."

The Examining Attorney has set forth an acceptable identification with respect to these above-stated objections. Accordingly, Applicant has amended the identification of goods to that recommended by the Examining Attorney. Applicant has added the term "computer" in class 009 and the terms "all for others" in class 042. Applicant has also specified the electronic substrates and clarified the various computer software for process distributing systems and network software. Applicant submits that the identification of goods and services is now definite for purposes of registration. Accordingly, Applicant submits that its application in a condition suitable for publication and the same is respectfully requested.

Respectfully submitted,

Molly B. Markley (P54187)
